

IOSH Managing Health & Safety (5 Day Course)

Overview

This course de-mystifies health and safety. It is certified by The Institution of Occupational Safety and Health (IOSH), Europe's leading body for health and safety professionals. The course consists of 4 days tuition plus 1 day to carry out the IOSH examination which is pass or fail.

Is it right for me?

Suitable for those required to manage safely and effectively in compliance with both their organisation's policy and best practice in health and safety.

What will I learn?

By the end of the course you will be able to:

- Explain 'Working Safely'
- Define 'Hazard' and 'Risk'
- Demonstrate a practical understanding of a quantitative risk assessment technique
- Prepare and use active monitoring checklists and implement schedules for active monitoring, recording results and analysing records
- Outline the main provisions of the Health and Safety at Work Act 1974 and the Management of Health and Safety at Work Regulations 1999
- Outline relevant health and safety legislation, codes of practice, guidance notes and information sources such as the Health and Safety Executive
- Receive a nationally recognised certificate from Europe's leading professional body

What will it cover?

Introducing Managing Safely

Some managers may see health and safety as an add-on to their role – even an intrusion. The first module makes it clear that managers are accountable for their teams, and makes a persuasive case for managing safely.

Assessing Risks

This module defines and demystifies 'risk' and 'risk assessment'. Risk assessments and a simple scoring system are introduced, and delegates carry out a series of assessments.

Controlling Risks

Here the session tackles cutting risks down, concentrating on the best techniques to control key risks, and how to choose the right method.

Understanding your Responsibilities

This module looks at the demands of the law and how the legal system works, and introduces a health and safety management system.

Identifying Hazards

All the main issues any operation has to deal with are covered in this module – entrances and exits, work traffic, fire, chemicals, electricity, physical and verbal abuse, bullying, stress, noise, housekeeping and the working environment, slips, trips and falls, working at height, computers and manual handling.

Investigating Accidents and Incidents

The session starts with why accidents should be investigated, and goes on to cover why things go wrong, and how to carry out an investigation when they do.

Measuring Performance

This module explains how checking performance can help to improve health and safety. Delegates learn how to develop basic performance indicators, and get to grips with auditing and proactive and reactive measuring.

Protecting our Environment

A short but effective introduction to waste and pollution leads into a look at how organisations and individual managers can get involved in cutting down environmental impacts.

Assessment & Certification

- Regular assessment is carried out throughout the event. Final assessment is by means of a project which must be returned to the course leader within 10 days of completing the course.
- An IOSH 'Managing Safely' certificate is awarded to all those who successfully complete both the written and practical assessments.

What will the course cost?

- In-House (Discreet Group): £5000 for up to 12 Students
- Open Course: £500 Per Person
